Beta Testing Script

1. Go to the homepage of our website:
   https://oneeventplanner-eedd47a49506.herokuapp.com/dashboard/
2. Sign into the dashboard by clicking the "Sign in with Google" button.
3. Sign in using a personal Google Account and verify that you are routed to the dashboard.
4. The dashboard should contain the user's profile information on the left-hand side. Does it properly show your username, name, and email?
5. The dashboard also contains information about 'Your Events' and 'Friend Events'. Try creating a new event by clicking the "Add Event" button. Does the 'Add New Event' window pop-up?
6. Fill out the information for the event and press the "Save Event" button. This should close the pop-up window and route back to the dashboard, which should also now show your newly created event.
7. Are there any issues with the user interface? Any bugs to resolve with the display of events or multiple events made in succession? Additional comments?
8. Your new event shows your event title and its description. Click on the event title to route to a new screen with a list of attendees and a chat section. Are you able to click the hyperlink on the event title? Does it work after refreshing the window?
9. Clicking the hyperlink will route to a second screen with additional details related to your event. Any issues with chat and RSVP functionality? Are there fields or buttons you cannot click on? Are you able to RSVP on your own event?
10. Return to the dashboard using the button at the bottom, and then press the "Edit" button on your event card. After making changes to the title, description, or date, do these changes reflect on the dashboard after pressing the "Save" button?
11. Try adding a friend using the "Add Friend" button. Use the email: 'davewag02@gmail.com' and verify that dave's one event is listed on your dashboard under 'Friend Events' now. Does it show up? Does it work after refreshing the page?
12. Are there any issues with the user interface? Any bugs to resolve with the display of events or multiple friends made in succession? Additional comments?
13. Click on the title of dave's event and leave an RSVP and a comment on their event. Maybe leave a like too! Verify that these changes stay even after returning to the dashboard and viewing the event again.
14. Now let's try out the uploading file tab. Click on "Upload" on the navigation bar at the top and it should route you to a page titled 'Upload Files'.
15. Fill out the information for the file upload and then choose a file from your device's file explorer. Select an event type then click the "Upload" button. Verify that your file shows up in the list titled 'Uploaded Files' at the bottom of the screen.
16. Click on the title of your file to open a new screen titled 'File Details'. Verify that the uploaded file is the intended file you selected from your device. Also test that you can download a duplicate of your original file after pressing the "Download Original File" button.
17. Return back to the 'Upload' screen. Verify that you can delete files that you have uploaded by pressing the red "Delete" button next to each file row. Does the file disappear from the list?
18. Go back to the dashboarding using the navigation bar at the top. Try deleting your event as well using the red "Delete" button under the event description. Does the event disappear from the 'My Events' section? Do you need to refresh to remove the event?
19. Logout using the "Logout" button on the navigation bar. Does it take you back to the initial screen?
20. Any design changes or additional features we can add? Final thoughts?
